

NAME

btrfs-map-logical – map btrfs logical extent to physical extent

SYNOPSIS

btrfs-map-logical <options> <device>

DESCRIPTION

btrfs-map-logical can be used to find out what the physical offsets are on the mirrors, the result is dumped to stdout by default.

Mainly used for debug purpose.

OPTIONS

- l|--logical <logical_num>
Logical extent to map.
- c|--copy <copy>
Copy of the extent to read(usually 1 or 2).
- o|--output <filename>
Output file to hold the extent.
- b|--bytes <bytes>
Number of bytes to read.

EXIT STATUS

btrfs-map-logical will return 0 if no error happened. If any problems happened, 1 will be returned.
