

NAME

bundle-show – Shows all the gems in your bundle, or the path to a gem

SYNOPSIS

bundle show [GEM] [--paths]

DESCRIPTION

Without the [GEM] option, **show** will print a list of the names and versions of all gems that are required by your [**Gemfile(5)**][Gemfile(5)], sorted by name.

Calling show with [GEM] will list the exact location of that gem on your machine.

OPTIONS

--paths

List the paths of all gems that are required by your [**Gemfile(5)**][Gemfile(5)], sorted by gem name.
