

NAME

devlink-region – devlink address region access

SYNOPSIS

devlink [*OPTIONS*] **region** { *COMMAND* | **help** }

OPTIONS := { **-V**[*ersion*] | **-n**[*no-nice-names*] }

devlink region show [*DEV/REGION*]

devlink region del *DEV/REGION* **snapshot** *SNAPSHOT_ID*

devlink region dump *DEV/REGION* **snapshot** *SNAPSHOT_ID*

devlink region read *DEV/REGION* [**snapshot** *SNAPSHOT_ID*] **address** *ADDRESS* **length** *LENGTH*

devlink region help

DESCRIPTION

devlink region show - Show all supported address regions names, snapshots and sizes

DEV/REGION - specifies the devlink device and address-region to query.

devlink region del - Delete a snapshot specified by address-region name and snapshot ID

DEV/REGION - specifies the devlink device and address-region to delete the snapshot from

snapshot *SNAPSHOT_ID* - specifies the snapshot ID to delete

devlink region dump - Dump all the available data from a region or from snapshot of a region

DEV/REGION - specifies the device and address-region to dump from.

snapshot *SNAPSHOT_ID* - specifies the snapshot-id of the region to dump.

devlink region read - Read from a specific region address for a given length

DEV/REGION - specifies the device and address-region to read from.

snapshot *SNAPSHOT_ID* - specifies the snapshot-id of the region to read.

address *ADDRESS* - specifies the address to read from.

length *LENGTH* - specifies the length of data to read.
