

NAME

dmmp_context_timeout_set – Set IPC timeout.

SYNOPSIS

void dmmp_context_timeout_set (struct dmmp_context *ctx, unsigned int tmo);

ARGUMENTS

ctx	Pointer of 'struct dmmp_context'. If this pointer is NULL, your program will be terminated by assert.
tmo	Timeout in milliseconds(1 seconds equal 1000 milliseconds). 0 means infinite, function only return when error or pass.

DESCRIPTION

By default, the IPC to multipathd daemon will timeout after 60 seconds.

RETURN

void
