

NAME

dpkg-distaddfile – add entries to debian/files

SYNOPSIS

dpkg-distaddfile [*option...*] *filename section priority*

DESCRIPTION

dpkg-distaddfile adds an entry for a named file to **debian/files**.

It takes three non-option arguments, the filename and the section and priority for the **.changes** file.

The filename should be specified relative to the directory where **dpkg-genchanges** will expect to find the files, usually **..**, rather than being a pathname relative to the current directory when **dpkg-distaddfile** is run.

OPTIONS

-f *files-list-file*

Read or write the list of files to be uploaded here, rather than using **debian/files**.

–?, --help

Show the usage message and exit.

--version

Show the version and exit.

ENVIRONMENT**DPKG_COLORS**

Sets the color mode (since dpkg 1.18.5). The currently accepted values are: **auto** (default), **always** and **never**.

DPKG_NLS

If set, it will be used to decide whether to activate Native Language Support, also known as internationalization (or i18n) support (since dpkg 1.19.0). The accepted values are: **0** and **1** (default).

FILES**debian/files**

The list of generated files which are part of the upload being prepared. **dpkg-distaddfile** can be used to add additional files.
