

NAME

fc-validate – validate font files

SYNOPSIS

fc-validate [**-Vhv**]

[[**-i** *index*] [**--index** *index*]] [[**-l** *lang*] [**--lang** *lang*]] [**--verbose**] [**--version**] [**--help**] *font-file*...

DESCRIPTION

fc-validate validates *font-file*(s) if each fonts satisfies the language coverage according to the orthography files in fontconfig. If **--index** is given, only one face of each file is validated, otherwise all faces are validated.

OPTIONS

This program follows the usual GNU command line syntax, with long options starting with two dashes ('-'). A summary of options is included below.

- i** Only query face indexed *index* of each file.
- l** Set *lang* as a language instead of current locale. this is used for **-m**.
- v** Show more detailed information.
- V** Show version of the program and exit.
- h** Show summary of options.

font-file

Query *font-file* for font faces.

RETURN CODES

fc-validate returns error code 0 for successful parsing, or 1 if any errors occurred or if at least one font face could not be opened.
