NAME
>   fprintd − Fingerprint management daemon, and test applications

SYNOPSIS
>   **fprintd-enroll** [−f finger] [usename]
>
>   **fprintd-list** username [usernames...]
>
>   **fprintd-verify** [−f finger] [usename]
>
>   **fprintd-delete** username [usernames...]

DESCRIPTION
>   This manual page documents briefly the **fprintd** command-line utilities.
>
>   The **fprintd** daemon is accessed through **D−Bus** by those command-line utilities.

ARGUMENTS
>   **username**
>>   The username for the user for which you want to query or modify the fingerprint database.
>>
>>   Not that **fprintd-list** and **fprintd-delete** require at least one username to be passed, and support multiple usernames.
>>
>>   **fprintd-enroll** and **fprintd-verify** will use the current username if none are passed on the command-line.
>
>   **−f finger**
>>   For **fprintd-enroll**, the finger to enroll. Possible values are:
>>
>>   left-thumb, left-index-finger, left-middle-finger, left-ring-finger, left-little-finger, right-thumb, right-index-finger, right-middle-finger, right-ring-finger, right-little-finger.
>>
>>   The default is automatic, selecting the first available finger for swipe devices, or all the enrolled fingers, for press devices.

TEST APPLICATIONS
>   **fprintd-enroll**
>>   Will enroll the user's right index finger into the database.
>
>   **fprintd-list**
>>   Will list the user's enrolled fingerprints.
>
>   **fprintd-verify**
>>   Will verify the user's fingerprints against the database.
>
>   **fprintd-enroll**
>>   Will enroll the user's right index finger into the database.

AUTHOR
>   **fprintd** was written by Bastien Nocera and Daniel Drake.

DIRECTORIES
>   By default, fprintd stores the fingerprints in **/var/lib/fprint/**
