

**NAME**

**gnome-language-selector** – graphical language selection utility

**SYNOPSIS**

**gnome-language-selector** [*OPTIONS*]

**DESCRIPTION**

**gnome-language-selector** is a graphical utility that allows a user to set a default language for the system interface and to add additional language packs, spelling tools and additional fonts.

**OPTIONS**

**-h, --help**

show this help message and exit

**-n, --no-verify-installed-lang-support**

do not verify installed language support

**-d DATADIR, --datadir=DATADIR**

use an alternative data directory instead of the default `/usr/share/language-selector`
