NAME

gnome-session-quit – End the current GNOME session

SYNOPSIS

gnome-session-quit [−−logout|−−power-off|−−reboot] [−−force] [−−no-prompt]

DESCRIPTION

The *gnome-session-quit* program can be used to end a GNOME session.

OPTIONS

The following options are supported:

--logout

Prompt the user to confirm logout. This is the default behavior.

--power-off

Prompt the user to confirm system power off.

--reboot

Prompt the user to confirm system reboot.

--force Ignore any inhibitors.

--no-prompt

End the session without user interaction. This only works with *--logout*.

BUGS

If you find bugs in the *gnome-session-quit* program, please report these on https://bugzilla.gnome.org.
