

**NAME**

jupyter-console – Jupyter terminal client

**SYNOPSIS**

**jupyter console** [options]

**DESCRIPTION**

Interactive terminal client for kernels using the Jupyter protocol.

**OPTIONS**

Only a subset of options are listed here. To see the complete list, run **jupyter console --help-all**

--existing [ID]

Connect to an existing kernel. If no argument is given, connect to the most recent.

--no-confirm-exit

Don't prompt for confirmation when exiting.

--kernel NAME

Name of the language kernel to use (default: python)

--debug

Enable debugging output
