## NAME

nohup – run a command immune to hangups, with output to a non-tty

## SYNOPSIS

nohup COMMAND [ARG]... nohup OPTION

#### DESCRIPTION

Run COMMAND, ignoring hangup signals.

--help display this help and exit

#### --version

output version information and exit

If standard input is a terminal, redirect it from an unreadable file. If standard output is a terminal, append output to 'nohup.out' if possible, '\$HOME/nohup.out' otherwise. If standard error is a terminal, redirect it to standard output. To save output to FILE, use 'nohup COMMAND > FILE'.

NOTE: your shell may have its own version of nohup, which usually supersedes the version described here. Please refer to your shell's documentation for details about the options it supports.

#### AUTHOR
