

**NAME**

pbmtobbnbg - convert a portable bitmap into BitGraph graphics

**SYNOPSIS**

**pbmtobbnbg** [*rasterop*] [*x y*] < *pbmfile*

**DESCRIPTION**

Reads a portable bitmap as input. Produces BBN BitGraph terminal Display Pixel Data (DPD) sequence as output.

The rasterop can be specified on the command line. If this is omitted, 3 (replace) will be used. A position in (x,y) coordinates can also be specified. If both are given, the rasterop comes first. The portable bitmap is always taken from the standard input.

Note that there is no bgtopbm tool.

This program was initially named pbmtobg.
