# **NAME**

pnmmargin - add a border to a portable anymap

# **SYNOPSIS**

pnmmargin [-white|-black|-color colorspec] size [pnmfile]

# **DESCRIPTION**

Reads a portable anymap as input. Adds a border of the specified number of pixels, and produces a portable anymap as output.

# **OPTIONS**

You can specify the border color with the **-white**, **-black**, and **-color** flags. If no color is specified, the program makes a guess.

# **SEE ALSO**

pnm(5)

# **BUGS**

It's a script. Scripts are not portable to non-Unix environments.
