NAME
>   roff2pdf − transform roff code into pdf mode

SYNOPSIS
>   **roff2pdf** [*groffer-option* …] [**−−**] [*filespec* …]
>
>   **roff2pdf −h**
>   **roff2pdf −−help**
>
>   **roff2pdf −v**
>   **roff2pdf −−version**
>
>   The options **−v** and **−−version** print the version information of the program to standard output and exit.
>   The options **−h** and **−−help** print a usage information of the program to standard output and stop the pro-
>   gram instantly.
>
>   All other options are assumed to be **groffer** options. They are internally passed to **groffer**. They override
>   the behavior of the program. The options are optional, they can be omitted.
>
>   The *filespec* arguments correspond to the *filespec* arguments of **groffer**. So they are either the names of ex-
>   isting, readable files or **−** for standard input, or the name of a man page or a **groffer**(1) man page search
>   pattern. If no *filespec* is specified standard input is assumed automatically.

DESCRIPTION
>   **roff2pdf** transforms *roff* code into *pdf* mode. Print the result to standard output.
>
>   There are more of these programs for generating other formats of *roff* input.
>
>   **roff2dvi**(1)
>>   is for *dvi* mode.
>
>   **roff2html**(1)
>>   generates *HTML* output.
>
>   **roff2ps**(1)
>>   prints *PostScript* format to standard output.
>
>   **roff2text**(1)
>>   generates text output in the **groff** device *latin1*.
>
>   **roff2x**(1)
>>   prints the output in the **groff** device **X** that is suitable for programs like **gxditview**(1) or
>>   **xditview**(1).

AUTHORS
>   **roff2pdf** was written by Bernd Warken ⟨groff−bernd.warken−72@web.de⟩.
