

NAME

sbattach - UEFI secure boot detached signature tool

SYNOPSIS

```
sbattach --attach <sigfile> <efi-boot-image>
sbattach --detach <sigfile> [--remove] <efi-boot-image>
sbattach --remove <efi-boot-image>
```

DESCRIPTION

Attach or detach a signature file to/from a boot image

OPTIONS

```
--attach <sigfile>
    set <sigfile> as the boot image's signature table
--detach <sigfile>
    copy the boot image's signature table to <sigfile>
--remove
    remove the boot image's signature table from the original file
--signum
    signature to operate on (defaults to first)
```
