NAME

systemd-binfmt.service, systemd-binfmt - Configure additional binary formats for executables at boot

SYNOPSIS

systemd-binfmt.service

/lib/systemd/systemd-binfmt

DESCRIPTION

systemd-binfmt.service is an early boot service that registers additional binary formats for executables in the kernel.

See **binfmt.d**(5) for information about the configuration of this service.

OPTIONS

--unregister

If passed, instead of registering configured binary formats in the kernel, the reverse operation is executed: all currently registered binary formats are unregistered from the kernel.

--cat-config

Copy the contents of config files to standard output. Before each file, the filename is printed as a comment.

--no-pager

Do not pipe output into a pager.

-h, --help

Print a short help text and exit.

--version

Print a short version string and exit.
