

NAME

afs_syscall, break, fattach, fdetach, ftime, getmsg, getpmsg, gttty, isastream, lock, madvise1, mpx, prof, profil, putmsg, putpmsg, security, stty, tuxcall, ulimit, vserver – unimplemented system calls

SYNOPSIS

Unimplemented system calls.

DESCRIPTION

These system calls are not implemented in the Linux kernel.

RETURN VALUE

These system calls always return `-1` and set *errno* to **ENOSYS**.

NOTES

Note that **ftime(3)**, **profil(3)**, and **ulimit(3)** are implemented as library functions.

Some system calls, like **alloc_hugepages(2)**, **free_hugepages(2)**, **ioperm(2)**, **iopl(2)**, and **vm86(2)** exist only on certain architectures.

Some system calls, like **ipc(2)**, **create_module(2)**, **init_module(2)**, and **delete_module(2)** exist only when the Linux kernel was built with support for them.

SEE ALSO

syscalls(2)

COLOPHON

This page is part of release 5.05 of the Linux *man-pages* project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at <https://www.kernel.org/doc/man-pages/>.
